

COMFRC Industry Day 24 MAY 2022 - Questions From Break-Out Rooms

DIGITAL - Jennifer Blake

Questions from Industry:

1. **What are the issues you are hearing from the FRCs?** FRCs find it hard to get Wi-Fi functioning, they are not happy with the network, they would like an operational infrastructure where they can have sandboxes
2. **Are you looking to control more of your IT?** Potentially, they've started putting together a plan. They still need buy-in
3. **Integration of digital engineering or model-based systems engineering (MBSE), what is the vision?**
4. **Is there a plan to integrate the disparate TeamsCentres?**
5. **How long have you been looking to implement electronics work order and what is the best way to engage in the conversation?** Maggie said you can start with her as the (PCO)
6. **Modernizing applications, can you talk about those initiatives?** Jennifer has been working with the Logistics Commodity Line Managers to understand the requirements
7. **In regards to providing better network capabilities and capturing requirements from the Depots. How can you move forward if you don't have the knowledge of what's available?** Jennifer said the depots are working with her and THEY have the knowledge of what's available.
8. **Is there a desire for a COMFRC Enterprise Operations to capture requirements across FRCs?** Jennifer said Leadership is working together to understand how that will operate.
9. **Upcoming work for PEO-MLB or PEO-CS?** PEO-MLB released an RFI (with 2 actions) on sam.gov there was a lot of info provided so it was broken into two pieces, one on Seaport LOG-IT PI with the second moving forward as a MAC. PEO-CS will now come out as a Seaport TO
10. **Steve – can you talk about Cyber as a Priority?** Ms. Jen Copey works for Ms. Blake and specializes in that area. FRCs going through CCRI at this time.
11. **Who is the lead for LOG-IT?** Jennifer is the point for COMFRC, Kelvin Carson for PEO-CS
12. **Do you have a chief engineer dedicated to you?** Jennifer is currently leveraging resources at the sites. Jennifer's focus: ensuring we can get the digital shop floor started
13. **Are you going to issue a separate WO for MRO?** Jennifer does not know
14. **What can industry folks do to support post Industry Day?** Responding to the RFIs with the capability statements. Procurement is using the feedback from industry to the RFIs to make changes to what they believe are their requirements based on the knowledge that they have today.
15. **Are there plans in the works for AVPLM improvement?** VMware would love to have the conversation regarding a better way of doing this.

Jennifer: As we move forward we are going to need to show ROI and progress, they have folks on board working on that

16. **Flank Speed, what do you think?** Jennifer: artisans do not need FS, concerned from a cost perspective we will potentially roll out to a lot of folks that don't need it. Recommend coming at it bottom up and develop appropriate use cases
17. **Do you think we need to improve the IT with the artisans?**
Jennifer: the dream is the digital shop floor. All of our parts and pieces come from DLA we do not have our own inventory
18. **Where is the TO for digital shop floor?**
Maggie: all over the place and attempting to consolidate

SAFETY & COMPLIANCE GROUP

1. **3M Enterprise: Who do we engage at COMFRC to talk about substitute HEXCHROME and CADMIUM?** Crystal Colley: FST- Fleet support Team
2. **3M Enterprise: When can we set up a meeting with the FST group?**
Crystal Colley: Meeting will be set up actions to be taken by Ms. Crystal Colley.
3. **Crystal Colley: Do you have a replacement for CADMIUM?**
3M Enterprise: He will have to go find out.
4. **ACI Defense Group: Would you like to have a brief on our company's capability on HEXCHROME detection and removal?**
Crystal Colley: Yes.
ACI Defense Group: The company will contact you to set up a meeting.
5. **3M Enterprise: How many agency are dealing with HEXCHROME and CADMIUM?**
Crystal Colley: All agencies
6. **Crystal Colley: Why did you 3M discontinue the vacuum bag for filtration? We are having issues finding replacement for filter bags.**
3M Enterprise: It depends which generation of the products you are looking at. You might need to match up the correct sanders with the correct accessories and bags. We can do a sight visit to Jacksonville to do the process review.

SUPPLY

1. **A company, who does not have a long term repair contract with the government, wants to do a PPP but since they are not repair capable and just make new ones they cannot be a PPP partner?** No, we issue the solicitation and the company provides the proposal. The company can also submit white paper (the concept, problem or identifier you have and what you think your organization could offer to solve it).
2. **Explain PPP and the supply.** As the depo we fix it. The company whom we are partners with provide supply chain and the tech data, along with modifications.
3. **How do you manage and share the demand with a partnership?** Company would get provided a schedule on how many components we would do a quarter. The company would then figure out what was required to fix it and how many replacement factors there is.
4. **When going through the process with a partnership how is it executed? Are there systems we use?** We go through DLA and WSS for repairable, consumable. Through PPL the parts are provided and paid through the depo.
5. **Do we have any PPP with 100% repair?** Jack and Adrienne to find out.
6. **What is the best way to give more tech capability with white paper?** Reach out the Acquisition Group to give a rundown on who you are, you will then become the POC and meet with someone with a meeting time. They would ask who would be interested in this (digital, production, etc.), they would bring those people into the meeting and connect with other stakeholders interested.
