#### PURPLE MAZE

• The FBI's Purple Maze case highlights the breadth of our trade secrets and intellectual property that our foreign adversaries are trying to steal. The investigation began after Dupont Pioneer reported to the FBI a suspicious incident in one of their proprietary corn fields. What ensued was nearly a three year investigation involving wiretaps on phones, bugs in cars, and executives from one of China's largest agricultural companies attempting to smuggle corn seed out to China and Canada in microwave popcorn boxes and subway napkins hidden in their clothing. The main actor, Robert Mo (Hailong), a U.S. company owner, hosted multiple Chinese citizens and all were charged with conspiracy and theft of trade secrets / intellectual property.

#### CHINESE CYBERATTACK

- Four members of the Chinese military were charged in February 2020 with allegedly hacking the credit bureau Equifax (in 2017) and stealing the personal information of around 145 million Americans.
- In an indictment handed up by a grand jury in Atlanta, the men face nine counts including conspiracy to commit computer fraud and conspiracy to commit economic espionage.

#### COLONIAL PIPELINE RANSOMWARE ATTACK
